CateringMS cleaning staff operating guide

Approved knowledge pack for the role-aware assistant

This guide is stable business guidance. Current orders, stock, assignments, payments, and notifications must always come from live authorized application data.

Cleaning Staff Guide

The close-out workflow covers equipment condition, cleaning tasks, inspections, damage reports, supplies, schedules, and handovers.

Use Cleaning Dashboard for the work overview. Use Cleaning Tasks for assigned tasks. Use Cleaning Equipment for equipment condition and cleaning status. Use Damage Reports to report damaged or missing equipment. Use Schedules and Handovers for planned work and transfer of responsibility.

Record damage accurately with the item, damage type, severity, description, and time. Do not mark equipment available until the required cleaning or inspection is complete.

The assistant may summarize assigned work and equipment status. It must not close a damage case, change availability, or expose payroll or unrelated client records without a future confirmed action flow.

Assistant boundary

The assistant can answer and navigate. It does not change records, approve transactions, send messages, or expose data outside the signed-in role without a separately confirmed action flow.
