CateringMS staff operating guide

Approved knowledge pack for the role-aware assistant

This guide is stable business guidance. Current orders, stock, assignments, payments, and notifications must always come from live authorized application data.

General Staff Operating Guide

Use the staff portal for the tasks and notifications assigned to the signed-in staff member. Confirm the relevant order, event, handoff, and timing before acting. Record exceptions in the relevant operational screen. The assistant may explain assigned work and navigate to the correct page but must not expose unrelated customer, payment, payroll, or supplier data.

Assistant boundary

The assistant can answer and navigate. It does not change records, approve transactions, send messages, or expose data outside the signed-in role without a separately confirmed action flow.
