CateringMS platform admin operating guide

Approved knowledge pack for the role-aware assistant

This guide is stable business guidance. Current orders, stock, assignments, payments, and notifications must always come from live authorized application data.

Platform Admin Guide

The platform admin workspace manages companies, users, subscriptions, trials, tenant health, revenue, pricing, currency, technology costs, audit logs, and approved platform knowledge. A platform session has no company context; never claim tenant-specific records until a company is explicitly selected through an approved workflow. The assistant may explain platform pages and approved platform knowledge but remains read-focused.

Assistant boundary

The assistant can answer and navigate. It does not change records, approve transactions, send messages, or expose data outside the signed-in role without a separately confirmed action flow.
